

Keep your notebook PC running like new. HP makes it easy.

Protect the health of your HP or Compaq notebook PC. It's easy to do and HP shows you how! With the help of this simple, do-it-yourself PC tune-up calendar, you can keep your notebook PC running at peak efficiency—and easily prevent viruses, sluggish performance and other problems before they happen.

This calendar, part of HP's updated online PC tune-up site, shows you how simple it is to perform regular system checks, software updates, hardware cleaning, anti-virus security scans and more. See how quick and convenient it is to maintain your notebook and keep it running like new. Get started today!

Be sure to visit www.hp.com/go/techcenter/pctuneup on a regular basis for instructions on the steps listed below and the latest updates on caring for all your HP and Compaq products.

Once a week

Pick any day of the week and make that your day to perform these vital scans, updates and backups to keep your data and photos safe, and your notebook PC secure and virus-free.

- Keep your notebook safe. Do a full virus scan and update your anti-virus software.
- Avoid disasters. Make a full file backup.
- Get the best defense against spyware and viruses. Keep your software up-to-date.

Once a month

You probably pay your bills on the same day every month. By following these simple step-by-step instructions for performing important maintenance at the same time every month, chances are very good that your bills won't include one for notebook PC repair.

- Get where you're going faster. Search for and download software and driver updates for your HP products.
- Perform the HP System Health Check. This simple automated task will let you know if you need to update any software or hardware.
- Make room for new programs and current files. Perform a disc cleanup to remove outdated files and applications.
- Defragment your hard drive, optimize your applications and delete old, unneeded files.
- Create a system restore point. If you encounter problems, you will have a saved snapshot to return to.

Once every three months

Like a lot of people, you probably review and revise your investments, file taxes or receive dividends every quarter. Follow these simple instructions and perform these important steps every three months and you will be rewarded with a dependable, trouble-free notebook PC.

- Make the most of the storage space on your hard drive by correctly removing old programs and unused desktop icons.
- Keep it neat. Clean your mouse, keyboard and display screen.

Once a year

Every 12 months almost everyone sees a doctor for their annual checkup. Give your notebook PC the clean bill of health it deserves. Whether you're a casual user or a power user, here are a few simple steps to help keep your notebook running at peak performance.

- Casual users:** Back up a year's worth of photos and files to a CD or DVD.
- Power users:** Start fresh. Back up all your files and applications on an external hard drive, then use your original system installer discs to erase, rebuild and reinstall your operating system from scratch. Also reinstall your applications and personal data.
