

## Project 2 — Fly Fishing T-Shirt Iron-ons

### Materials

- 1 sheet of HP Inkjet T-Shirt Transfer Iron-on
- 1 T-shirt or other fabric
- X-acto utility knife or scissors
- Metal ruler
- Cutting mat

### Instructions

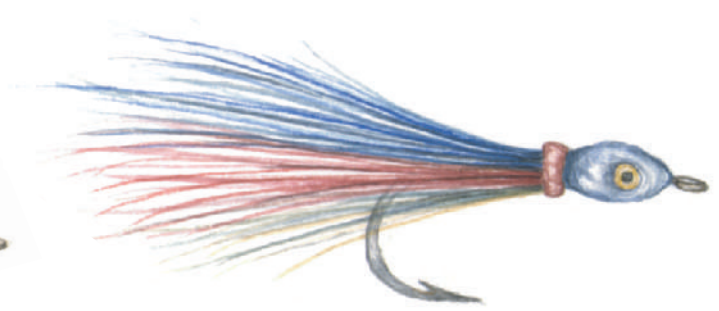

1. Print your iron-on transfer. Set aside to dry completely.
2. Cut out the flies on the page just inside the grey dotted line. Play with their placement on your shirt. You may want to place the large group of flies on the front center and the single flies on the sleeve and at the base of the neck on the back of your shirt.
3. Follow the directions on the box to iron the design onto your T-shirt.
4. Don't forget—the downloaded image will be backwards until you iron it on.

*Caution: Do not use iron-on transfer sheets in a laser printer or any printer that heats the paper. These printers might melt the transfer paper, which could damage the printer.*

*yellow sweeping streamer*

*meadowhopper buckettail*

*tailing fly brown*

*buckettail streamer*

*fat dry daffodil*
