

Project 5 – Personal ID Card

Materials

- Card stock
- Photo laminating sheets
- Non-toxic ink pad
- Scissors

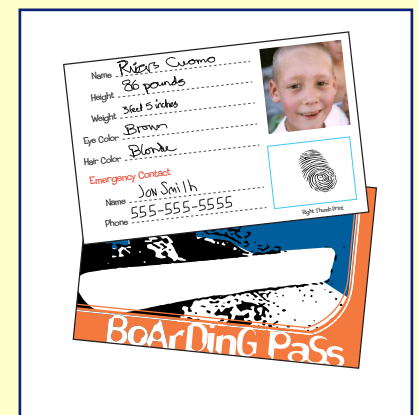

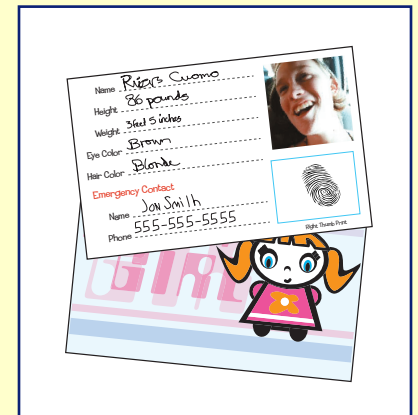

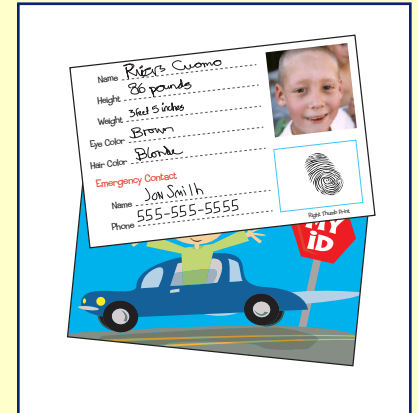

Choose your favorite design

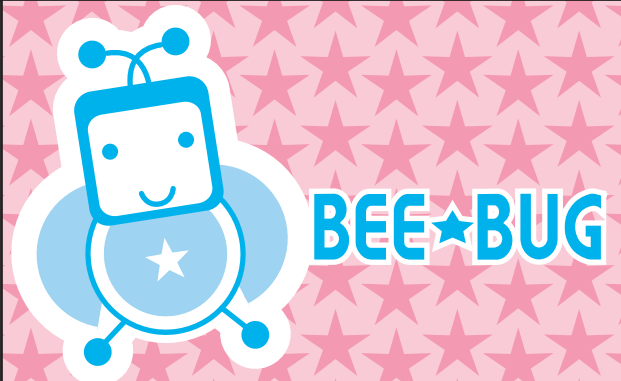

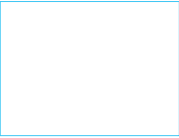

The art can be found on the following pages:

- Beebug and Po Popo (2 designs) – page 2
- Baseball Boy, Groovy Girl, and Snowboard Gear (3 designs) – page 3

Instructions

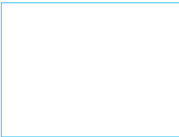

1. Print your design on a piece of card stock. Be sure to let it dry completely before filling in your personal information.
2. Write in your info and place a close-up photo of yourself on the card. Whether you use a digital photo or a school picture, you'll want to trim it down to the correct size and tape it to the card. (It's important to use a current photo.)
3. Cut out your card.
4. Lightly press your right thumb on the inkpad (dark colors work best). Gently make a thumbprint in the space provided on the card.
5. Using the center line as a guide, fold the tag in half.
6. Following the instructions on the photo laminating sheets, laminate your card.
7. Trim the extra laminate off the edges.
