

1. Print this page and cut around the perimeter of the red box.

2. Fold each corner in on inside white lines, keeping the red on the inside. After folding the corners in, fold back the triangular portion of each point on outer white line to expose the red.

3. Print page 2 and cut it out to fit inside of this envelope.

4. After placing square card inside, fold in each flap of the envelope one at a time to close. The last flap will tuck in under the first to keep the envelope closed.
